

Herb Project Award

We watched a local business complex design and plant a seating area and garden space, for staff, visitors and the public to relax and use as a lunch area.

Our Glen Eden Herb group raised the idea of planting herbs, so two planters were installed, as the first areas we could plant up.

The grant, our group received, enabled us to fill the beds with soil, purchase herb plants, and label the plants.

We knew the herbs were going to be picked and tasted, also the café in the complex was using them in food and decoration, so we ensured the plants were all edible and labeling reflected this. We had information sheets available with ideas for their use.

Our members enthusiastically continue to maintain, replant where necessary and the group can use the herbs for workshop projects and teaching.

The financial award received from HFNZ enabled us to showcase the culinary herbs we use, and enhance the area with our plantings.
